

ABOUT

As a dynamic Vue.js developer and mentor with **5+ years** of experience, I excel in building and maintaining robust web applications. My expertise spans JavaScript and various frontend technologies, with a focus on testing and debugging.

Driven by innovation and a passion for learning, I thrive on new challenges. A collaborative team player with a strong work ethic, I'm dedicated to achieving shared goals and contributing to groundbreaking projects.

SĂVULESCU MIHNEA-ALEXANDRU

VUE.JS DEVELOPER

WORK EXPERIENCE

Frontend Developer @ Wallbid 2023 - Present

As a Frontend Developer at Wallbid, I contribute to the development and enhancement of a cutting-edge full-stack insurance distribution platform that seamlessly integrates new-generation insurance products into digital ecosystems.

Embedded Insurance System

- **Spearheaded the development of multiple projects from scratch**, ensuring a robust and user-friendly interface that meets the diverse needs of our clients.
- **Enhanced the overall efficiency and aesthetics** of the platform by utilizing cutting-edge technologies to create high-performance, scalable, and maintainable frontend solutions.
- **Played a key role in a team-focused environment**, working closely with cross-functional teams to deliver high-quality insurance solutions that significantly reduce integration time from months to weeks.

Skills: Nuxt3, TypeScript, Pinia, GraphQL, TailwindCSS

Frontend Developer @ nShift 2021 - 2023

Being part of a team for a global leader in delivery management gives me the chance to develop my skills in multiple areas of expertise, being part of discussions and planning sessions, working close to other teams to overcome challenges, driven by passion and curiosity.

Transport Management System

- **Achieved a remarkable 25% enhancement in application performance** through the creation of reusable components, while maintaining a commitment to consistent code refactoring and optimization.
- **Increased user satisfaction by 25%** through the development of impactful components, collaborating with team members, resulting in the creation of an optimal user experience.
- **Undertaking the responsibility of maintaining a Jenkins environment with 0% failing builds.** When encountering any such occurrences, I collaborate closely with my team members, ensuring a collective effort to swiftly restore operations to their intended state.
- **Greatly improved security protocols by routinely checking all the dependencies**, ensuring project safety through vigilant upkeep of up-to-date libraries and fortifying them against vulnerabilities.

Skills: VueJS, TypeScript, Vuex, Pinia, LESS, Jenkins, NPM, Rest API, Vite, CSS/SASS

SKILLS

JavaScript	5 years
HTML	5 years
Tailwind/CSS	5 years
VueJS	5 years
TypeScript	3 years
Nuxt	3 years
Mongo DB	2 years
Vuetify/DaisyUI	2 years
Jenkins	2 years
Snyk	2 years
GraphQL	1 year

EDUCATION

- West University of Timișoara
- Bachelor in Computer Science
- Timișoara, 2015 - 2018

Frontend Developer @ Blockchain Engineering

2019 - 2021

As a member of the Blockchain Engineering team, I crafted reusable components and responsive interfaces that aligned seamlessly with the client's specifications. Additionally, I designed software tools aimed at automating tasks and elevating overall efficiency.

Web Dashboard

- **Achieved 5x increase in employee productivity** for the client through the successful implementation of a tailored VueJS web application to address their specific needs.
- **Successfully ensured that the app was fully deployed to production in only 6 months**, by engaging in a close collaboration with a team of 2 developers and 1 QA engineer.
- **Used Vuetify to develop an accessible interface**, enhancing user-friendliness. Additionally, introduced custom component behavior for precise user-oriented design.

Skills: VueJS, Vuetify, JavaScript, SCSS, MongoDB, NPM, Rest API, CSS/SASS

Doctor Recommendations Feature

- **Delivered 100% client satisfaction**, by designing and implementing an automated treatment system that dynamically generated personalized treatments based on client-selected options.
- **Successfully ensured** the feature was fully functional and deployed to production in 3 months, by being the solo developer and working with a QA.

Skills: VueJS, Vuetify, JavaScript, SCSS, NPM, CSS/SASS

Python Automation Scripts

- **Increased employee productivity up to 5x** through automation, achieved by developing Python scripts to streamline the entire document workflow.
- **Effectively ensured that the scripts are easy to use**, enabling users to achieve maximum results with minimal effort.
- **Successfully deployed** the scripts in 2 months, by working closely with 1 QA.

Skills: Python, PyPDF2, Pandas

Junior Software Developer @ Continental Automotive

2018

As a valued member of the Continental Automotive team, I played an integral role in the development of software designed to trigger restraint systems in the event of road accidents.

Embedded Systems Software

- **Enhanced software efficiency** by incorporating well-optimized data structures and algorithms.
- **Worked with embedded systems** tools such as debuggers, simulators, and emulators.
- **Applied programming languages that are specific for embedded systems**, with a notable example being the utilization of C++.

Skills: C++, Data Structures & Algorithms

EXTRACURRICULAR ACTIVITIES

Course Mentor @ GoIT Group

2023

I am actively engaged as a mentor on the GoIT platform, where I guide individuals in taking their initial steps in the realm of web development. I provide comprehensive support to help them grasp the fundamentals and build a strong foundation in this field.

- **Facilitate engaging and interactive mentorship sessions for 30+ students per week**, offering real-world examples, best practices, and personalized guidance to a deep understanding of web development concepts.
- **Collaborated closely with the course organizers and fellow mentors**, contributing to the mentoring strategies to enhance the overall learning experience.
- **Provided constructive feedback on projects and assignments**, enabling mentees to refine their skills and produce high-quality web development projects

Skills: HTML/CSS, JavaScript, Figma
